

# **WORLDWIDE MARINE RADIOFACSIMILE BROADCAST SCHEDULES**

**U.S. DEPARTMENT OF COMMERCE  
NATIONAL OCEANIC and ATMOSPHERIC ADMINISTRATION**

## **NATIONAL WEATHER SERVICE**

**November 9, 2016**

# INTRODUCTION

Ships....The U.S. Voluntary Observing Ship (VOS) program needs your help! If your ship is not participating in this worthwhile international program, we urge you to join. Remember, the meteorological agencies that do the weather forecasting cannot help you without input from you. **ONLY YOU KNOW THE WEATHER AT YOUR POSITION!!**

Please report the weather at 0000, 0600, 1200, and 1800 UTC as explained in the National Weather Service Observing Handbook No. 1 for Marine Surface Weather Observations.

Within 300 nm of a named hurricane, typhoon or tropical storm, or within 200 nm of U.S. or Canadian waters, also report the weather at 0300, 0900, 1500, and 2100 UTC. Your participation is greatly appreciated by all mariners.

For assistance, contact a Port Meteorological Officer (PMO), who will come aboard your vessel and provide all the information you need to observe, code and transmit weather observations.

This publication is made available via the Internet at:

<http://www.nws.noaa.gov/om/marine/rfax.pdf>

The following webpage contains information on the dissemination of U.S. National Weather Service marine products including radiofax, such as frequency and scheduling information as well as links to products. A listing of other recommended webpages may be found in the Appendix.

<http://www.weather.gov/marine>

This PDF file contains links to http pages and FTPMAIL commands. The links may not be compatible with all PDF readers and e-mail systems. The Internet is not part of the National Weather Service's operational data stream and should never be relied upon as a means to obtain the latest forecast and warning data. Become familiar with and use other means such as NOAA Weather Radio to obtain the latest forecasts and warnings. Please read our ***disclaimer***  
<http://www.nws.noaa.gov/disclaimer.php>.

# ABOUT THIS PUBLICATION

The schedules contained in this publication were obtained from official and unofficial sources. The information herein may neither be complete or accurate. Wherever possible, the schedules are dated with the latest change available. The National Weather Service would like to thank everyone who provided assistance.

For ease of use, all stations are listed by WMO region, in alphabetical order, by country and location. All times listed herein are Universal Coordinated Time (UTC), unless otherwise indicated.

Unless otherwise stated, assigned frequencies are shown, for carrier frequency subtract 1.9 kHz. Typically dedicated radiofax receivers use assigned frequencies, while receivers or transceivers, connected to external recorders or PC's, are operated in the upper sideband (USB) mode using carrier frequencies.

For information on weather broadcasts worldwide, also refer to NGA Publication 117, the Canadian Coast Guard Radio Aids to Navigation (Canada Only) and the British Admiralty List of Signals, which are updated through Notices to Mariners. Information on these and other marine weather publications may be found in Appendix D. These publications are HIGHLY recommended.

This document also includes information on how to obtain National Weather Service text forecasts, graphic forecasts, and marine observations via the Internet and e-mail (FTPMAIL). Mariners are highly encouraged to explore these options.

This PDF file contains links to http pages and FTPMAIL commands. The links may not be compatible with all PDF readers and e-mail systems. The Internet is not part of the National Weather Service's operational data stream and should never be relied upon as a means to obtain the latest forecast and warning data. Become familiar with and use other means such as NOAA Weather Radio to obtain the latest forecasts and warnings. Please read our ***disclaimer*** <http://www.nws.noaa.gov/disclaimer.php>.

**The accuracy of this publication depends on YOUR input.**

## NOTES:

This schedule of chart and text transmission is subject to short notice change according to the requirements of the Canadian Forces.

The geographical area of coverage for the ice charts varies according to season. The typical areas are: Gulf of St. Lawrence, East Newfoundland waters, Labrador Coast, Hudson Strait, Davis Strait and Baffin Bay. The Canadian Ice Service prepares all ice charts.

MAP AREAS: A. 56N 87W, 56N 24W, 34N 38W, 34N 73W E. 50N 75W, 50N 48W, 34N 48W, 34N 75W

 D. 60N 68W, 60N 33W, 43N 33W, 43N 68W H. 30N 107W, 15N 67W, 34N 24W, 79N 60W  
 I. 54N 100W, 58N 22W, 30N 39W, 28N 78W

The Canadian Forces Fleet MetOc Broadcast service (radioteletype and radiofacsimile) was placed in abeyance effective September 2, 2010. The Canadian Forces Fleet MetOc Broadcast may be reinstated and ceased without warning as necessitated by military operational requirements. When notified, MCTS will issue a Notice to Shipping concerning reinstatements or cessations of this service.

STREAMLINES ARE LINES OF CONSTANT WIND DIRECTION.  
WIND SPEEDS ARE GIVEN BY WIND BARBS INDEPENDENT OF STREAMLINES.

THE SIGNIFICANT CLOUD FEATURES CHARTS DEPICT CLOUD FEATURES BASED UPON IMAGES FROM THE VARIOUS GEOSTATIONARY AND POLAR ORBITING SATELLITES OVER THE PACIFIC. ABBREVIATIONS ON THESE CHARTS INCLUDE: AC - ALTOCUMULUS; AS - ALTOSTRATUS; BKN - BROKEN; CB - CUMULONIMBUS; CC - CIRROCUMULUS; CI - CIRRUS; CS - CIRROSTRATUS; CU - CUMULUS; FEW - FEW; ISOL - ISOLATED; LYRS - LAYERS; NS - NIMBOSTRATUS; OVC - OVERCAST; SC - STRATO-CUMULUS; SCT - SCATTERED; TCU - TOWERING CUMULUS; TSTM - THUNDERSTORM

RADIOFAX FREQUENCIES ARE ASSIGNED FREQUENCIES. TO CONVERT TO CARRIER FREQUENCIES, SUBTRACT 1.9 KHz FROM THE ASSIGNED FREQUENCIES.

YOU MAY ADDRESS COMMENTS ABOUT THIS BROADCAST TO:

Meteorologist In Charge  
National Weather Service  
2525 Correa Rd.  
Honolulu, HI 96822  
PHONE: (808) 973-5270/FAX: (808) 973-5281  
E-Mail W-HFO.operations@noaa.gov

Many of these charts also broadcast from Pt. Reyes, CA and Kodiak, AK

# APPENDICIES

# NATIONAL WEATHER SERVICE MARINE PRODUCTS VIA INTERNET INCLUDING RADIOFAX

The Internet is not part of the National Weather Service's operational data stream and should never be relied upon as a means to obtain the latest forecast and warning data. Become familiar with and use other means such as NOAA Weather Radio to obtain the latest forecasts and warnings. Please read our **disclaimer** <http://www.nws.noaa.gov/disclaimer.php>.

Note: Any reference to a commercial product or service does not imply any endorsement by the National Weather Service as to function or suitability for your purpose or environment.

## Marine Text Forecasts and Products

The majority of National Weather Service (NWS) forecasts and warnings may be found under the **NWS webpage** <http://www.nws.noaa.gov/>. Of specific interest to mariners are the **NWS Marine Text Forecasts and Products** <http://www.nws.noaa.gov/om/marine/home.htm#text>. For convenience, High Seas, Offshore and Coastal marine forecasts are subdivided by sea area or zone and available via the Internet using our text interface or graphic interface. Individual NWS Forecast Offices and Centers producing marine forecasts provide links to their products as well as additional regionally focused information.

## Explanation of Codes Used in Various Marine Text Forecasts and Weather Broadcasts:

- [Valid Time Event Code](#)
- [Universal Geographic Code \(UGC\)](#)
- [MAFOR](#)
- [Ships Synoptic Code \(BBXX\)](#)
- [MARS](#)
- [MAROB](#)
- [NOAA Weather Radio SAME Codes](#)
- [XML, CAP, RSS](#)
- [General Text Specification for Weather Products](#)
- [How to read the Hurricane Forecast/Advisory \(TCM\)](#), [More](#)
- Others (coming...check back)

## Marine Graphic Forecasts and Products

Graphic marine forecasts are produced by NWS for broadcast via **radiofax** <http://www.nws.noaa.gov/om/marine/radiofax.htm> and also made available via the Internet at **Marine Radiofax Charts** <http://tgftp.nws.noaa.gov/fax/marine.shtml>.

The National Weather Service also plans to make available marine forecast data in gridded and vector formats for display on electronic charts and use by other value-added applications. Graphics using these data are available via the Internet for most U.S. coastal areas. Also see **Computer Generated Model Guidance** below.

## Satellite and RADAR Imagery

Satellite imagery may be found on the **GOES webpage** <http://www.goes.noaa.gov/>, and is also available from **NASA** <http://rsd.gsfc.nasa.gov/goes/>. Ocean surface winds and other data derived from polar orbiting and geostationary satellites may be found on **NOAA's Marine Observing Systems Team Homepage** <http://manati.orbit.nesdis.noaa.gov/> and **NOAA's Coastwatch Homepage** <http://coastwatch.noaa.gov/>. Information and links to Sea Surface Temperature Charts and Gulf Stream charts may be found on our **FAQ** <http://www.nws.noaa.gov/om/marine/faq.htm> webpage. **NEXRAD Doppler Radar images** [http://radar.weather.gov/Conus/index\\_lite.php](http://radar.weather.gov/Conus/index_lite.php) are available on the Internet on the **NWS Homepage** <http://www.nws.noaa.gov/> and local **NWS Forecast Offices** [http://www.nws.noaa.gov/om/marine/marine\\_map.htm](http://www.nws.noaa.gov/om/marine/marine_map.htm) homepages. NEXRAD Doppler Radar images may also be found on local cable channels and the webpages of local media including TV stations, radio stations and newspapers as well as others.

## Ice Analysis, Forecasts and Iceberg Reports

Ice analyses, forecasts and iceberg reports are available from the **National Ice Center** <http://www.natice.noaa.gov/>, the **U.S. Coast Guard's International Ice Patrol** <http://www.uscg.mil/lantarea/iip/home.html>, and **local NWS marine forecast offices** [http://www.nws.noaa.gov/om/marine/marine\\_map.htm](http://www.nws.noaa.gov/om/marine/marine_map.htm) in areas such as **Alaska** <http://pafc.arh.noaa.gov/ice.php> where ice is a concern. Ice forecasts and observations are also made available as **radiofax** <http://www.nws.noaa.gov/om/marine/radiofax.htm>, **text products** <http://www.nws.noaa.gov/om/marine/home.htm#text> and computer generated model guidance.

## Computer Generated Model Guidance

Computer generated model guidance products used by marine forecasters is available from the **Ocean Modeling Branch** <http://polar.ncep.noaa.gov/>, **National Centers for Environmental Prediction** <http://www.ncep.noaa.gov/>, the **Environmental Modeling Center** <http://www.emc.ncep.noaa.gov/>, the "Operational Forecast System" Model Guidance from the National Ocean Service <http://tidesandcurrents.noaa.gov/models.html>, and the Great Lakes Coastal Forecasting System (GLCFS) <http://www.glerl.noaa.gov/res/glcfs/>.

NCEP model data in graphic and gridded binary (GRIB) form may be found on **NCEP's N.O.M.A.D.S. (NOAA Operational Model Archive Distribution System)** <http://www.nomad3.ncep.noaa.gov/>, NOMADS3 and NOMADS5 web servers.

The **Weather Charts** <http://weather.noaa.gov/fax/graph.shtml> webpage contains charts, intended as guidance to forecasters, which can prove of value to mariners. Note: Several charts listed under "Weather Charts", which are no longer required to support NWS operations, may be terminated or made available at alternate sites. This should not include those which are broadcast by marine radiofacsimile.

Caution...these data have not been validated by marine forecasters and may be misleading. Mariners should use these data in conjunction with forecaster generated forecasts.

## Marine Climatological Information

User-friendly climatological information for marine coastal areas may be found in **Appendix B of the National Ocean Service's Coast Pilot's, volumes 1-9** <http://chartmaker.ncd.noaa.gov/nsd/coastpilot.htm>. These appendices, which were prepared by the **National Climatic Data Center** <http://lwf.ncdc.noaa.gov/oa/ncdc.html>, also contain other useful meteorological information such as conversion tables. Visit their webpage for further information.

The National Geospatial-Intelligence Agency now makes available some of its **Pilot Charts** <http://msi.nga.mil/NGAPortal/MSI.portal> on-line.

## Foreign Marine Forecasts

Links to **foreign meteorological services** [http://www.wmo.int/pages/members/index\\_en.html](http://www.wmo.int/pages/members/index_en.html) , and foreign marine meteorological services are available courtesy of the **World Meteorological Organization (WMO)** [http://www.wmo.int/pages/index\\_en.html](http://www.wmo.int/pages/index_en.html).

The WMO has also introduced an experimental **GMDSS Webpage** <http://weather.gmdss.org/> which, as a first step, provides links to worldwide meteorological bulletins and warnings issued for the high seas via SafetyNet.

Also try **the Naval Oceanography Portal** <http://www.usno.navy.mil/> for data which is outside the area of U.S. marine forecast responsibility.

## WEBCAMS

The advent of the Internet has brought about a new type of observation system popular with beachgoers, surfers, and others - the WEBCAM which displays live images of current conditions. To find WEBCAMS for marine areas use your favorite Internet search engine to search for such key words as Beach Cams, Surf Cams, Coastal Cams, Ocean Cams, Port Cams and Cruise Cams. You may wish to refine your search by adding your geographic area to the search's key words.

## Buoy and Other Real-Time Observations

The latest coastal and offshore weather observations from NOAA fixed and drifting data buoys and Coastal-Marine Automated Network (C-MAN) stations may be found at the **National Data Buoy Center** <http://www.ndbc.noaa.gov/> webpage. Real time meteorological and oceanographic observations for several sites are also available from the **Physical Oceanographic Real-Time System (Ports)** <http://tidesandcurrents.noaa.gov/ports.html>. PORTS is a program of the U.S. **National Ocean Service** <http://oceanservice.noaa.gov/> that supports safe and cost-efficient navigation by providing ship masters and pilots with accurate real-time information required to avoid groundings and collisions. **Several National Ocean Service tide gages are also equipped with ancillary meteorological sensors** <http://tidesonline.nos.noaa.gov/geographic.html>. Regionally focused observation data may also be found on the webpages of local **NWS Forecast Offices** [http://www.nws.noaa.gov/om/marine/marine\\_map.htm](http://www.nws.noaa.gov/om/marine/marine_map.htm). Some marine observations may also be found on our **NWS Marine Product Listing and Schedule** <http://www.nws.noaa.gov/om/marine/forecast.htm>. Historical and real-time beach temperature data is available from the **NODC Coastal Water Temperature Guide** <http://www.nodc.noaa.gov/dsdt/cwtg/>.

NOAA's NCEP Central Operations **MADIS Database** (<https://madis.ncep.noaa.gov/>) offers a **Display of Surface Data** (<https://madis-data.ncep.noaa.gov/MadisSurface/>) from several government, commercial and voluntarily operated mesonets as well as observations of those of the **Voluntary Observing Ship (VOS) Program** <http://www.vos.noaa.gov/> and data buoys. A variety of marine observations may also be viewed on the **National Ocean Service's nowCOAST Web Portal (BETA)** <http://co-ops.nos.noaa.gov/nowcoast.html>.

For mariners with a low speed Internet connection..... The latest buoy or C-MAN data may be retrieved via the Internet as in the following example where 44017 refers to buoy #44017 and SJSN4 refers to non-floating observation platform SJSN4.

[http://www.ndbc.noaa.gov/mini\\_station\\_page.php?station=44017](http://www.ndbc.noaa.gov/mini_station_page.php?station=44017)  
[http://www.ndbc.noaa.gov/mini\\_station\\_page.php?station=SJSN4](http://www.ndbc.noaa.gov/mini_station_page.php?station=SJSN4)

## **Tide Predictions, Observations and Storm Surge Forecasts**

Near real-time Water Level Observations, and Predicted Tide Information for the calendar year <http://tidesandcurrents.noaa.gov/>, are available from the **National Ocean Service** <http://oceanservice.noaa.gov/> Read the **NOS Tides FAQ** <http://tidesandcurrents.noaa.gov/faq2.html> for further information on obtaining NOS tides and tidal current data. Caution is urged in using tide data made available at University and other webpages. This information may not be based on current government data and be of unknown quality.

Computer generated, **Extratropical Water Level Forecasts** <http://www.nws.noaa.gov/mdl/etsurge/> are available from the National Weather Service's **Meteorological Development Laboratory** <http://www.nws.noaa.gov/tidl/>. Status maps are provided to give the user a quick overview of a region. Forecasts of storm surge produced as a result of a tropical storm or hurricane are available from your **local NWS Forecast Office** <http://www.weather.gov/organization.php>.

The "**Operational Forecast System**" **Model Guidance from the National Ocean Service** <http://tidesandcurrents.noaa.gov/models.html> have been created to provide the maritime community with improved short-term predictions of water levels. *Please be advised that these predictions are based on a hydrodynamic model and, as such, should be considered as computer-generated forecast guidance.*

## **For Emergency Responders and Planners**

**NOAA's Office of Response and Restoration, National Ocean Service** <http://response.restoration.noaa.gov/index.php> offers a series of job aids and software to predict weather and ocean affects on the trajectory of hazardous materials such as oil spills. The information may be helpful for further applications as well.

## **Historic Weather Forecasts, Satellite Images and Oceanographic Data**

For historic weather forecasts, satellite images and oceanographic data, contact the National Climatic Data Center and National Oceanographic Data Center, found on our listing of **Phone Numbers and Addresses** <http://www.nws.noaa.gov/om/marine/phone.htm>.

## **Observations from Mariners**

All NWS marine forecasts rely heavily on the **Voluntary Observing Ship (VOS)** <http://www.vos.noaa.gov/program> for obtaining meteorological observations. Ship observations may also be found on **National Data Buoy Center - Observations Search** (<http://www.ndbc.noaa.gov/os.shtml>), **National Data Buoy Center - Ships Observation Report** ([http://www.ndbc.noaa.gov/ship\\_obs.php](http://www.ndbc.noaa.gov/ship_obs.php)), [CoolWX](http://www.coolwx.com), [SailWX.info](http://www.sailwx.com), and [Oceanweather](http://www.oceanweather.com), webpages.

The National Weather Service has a number of other volunteer observation programs including the **SKYWARN**, **MAREP**, **MAROB**, **MARS**, **APRSWXNET/Citizen Weather Observer Program (CWOP)** and the **Cooperative Observer Program (COOP)** see <http://www.nws.noaa.gov/om/marine/voluntary.htm> which are of benefit to the marine community.

## Marine Webpages

The Internet contains a great number of webpages of interest to the mariner. Visit our **Links** <http://www.nws.noaa.gov/om/marine/mlinks.htm> page for a listing of recommended webpages pertaining to Marine Weather. The **U.S. Coast Guard Maritime Telecommunications Information webpage** <http://www.navcen.uscg.gov/?pageName=maritimeTelecomms> contains an excellent description of marine communication systems. There are also many other Internet sites of interest to the mariner. Use one of the Internet search engines to search on topics such as "marine weather", "radiofax", "radiofacsimile", "weather buoys", "tides", etc. The **NOAA Library** <http://www.lib.noaa.gov/> provides an excellent listing of links to marine related webpages within NOAA and elsewhere.

## Marine Weather Publications On the Web

Many marine weather related government publications are available on the Web. Visit our **publications webpage** <http://www.nws.noaa.gov/om/marine/pub.htm> for several we recommend including our popular Marine Service Charts, the Weather Log Magazine, and our listing of Worldwide Marine Radiofacsimile Broadcast Schedules.

## Internet Access for Mariners

Internet at sea can be problematic unless you stay within cellular telephone range of shore. "**Marine WIFI**" technology is rapidly becoming popular at marinas and in favorite harbor areas. Satellite services including [Inmarsat](#), [Iridium](#), [Globalstar](#), [Thuraya](#), [Emsat](#), [ACeS](#), [tracNet/DirecPC](#), [BoatracS](#), [Orbcomm](#), and [MTN](#) are available, however, costs are generally greater. Several companies offer e-mail services designed to optimize satellite connectivity including [MAILASAIL](#), [OCENS](#), [UUPLUS](#) and [XGate](#). Full Internet access is often available if you have a satellite terminal onboard, but presently unless you restrict your use to e-mail messages, costs can be high. A number of satellite services such as Inmarsat-C offer e-mail messaging services only and provide no access to the World Wide Web. Several transmission and data compression schemes are available and in development to make the Web more accessible to the mariner. There are also several public FTP-to-EMAIL and WWW-to-EMAIL servers available to allow Internet access for users who do not have direct or cost effective access to the World Wide Web but who are equipped with an e-mail system. [CLICK HERE](#) for information. Low cost, worldwide, access to the World Wide Web via satellite should be available to the mariner in the next five to ten years.

If you have an HF marine radio, E-mail service is available from companies such as [Sailmail](#), [CruiseEmail](#), [Global Marine Networks](#), [Kielradio](#), [Globe Wireless](#) and [Shipcomm LLC \(WLO/KLB\)](#). E-mail can be accomplished at no cost using [amateur radio](#).

The domain of the Internet is rapidly expanding to now include wireless devices such as so-called "Internet-Ready" digital cellular phones and Personal Data Assistants (PDAs). These offer great potential for making marine forecasts available to coastal mariners, who have limited other options available. The majority of these other options are by voice where there is always the possibility of misunderstanding.

A webpage for the most popular marine text forecasts compatible with many celphones and PDA's may be found at [cell.weather.gov](http://cell.weather.gov).

A low bandwidth webpage containing marine and public forecasts intended for mobile devices may be found at: [mobile.weather.gov](http://mobile.weather.gov) (includes a capability to view the forecast for any zip/city and radar images).

Visit <http://www.nhc.noaa.gov/aboutwap.shtml> where you will find NHC's wireless web page. There you can find the link to obtain NHC's most popular hurricane products, offshore forecasts, and high seas forecasts.

## National Weather Service Products Available Via E-MAIL (FTPMAIL)

National Weather Service marine text forecasts, radiofax charts and buoy observations are available via e-mail. Further, FTPMAIL may be used to acquire any file on the [tgftp.nws.noaa.gov](http://tgftp.nws.noaa.gov) FTP server. The FTPMAIL server is intended to allow Internet access for mariners and other users who do not have direct access to the World Wide Web but who are equipped with an e-mail system. Turnaround is generally in under one hour, however, performance may vary widely and receipt cannot be guaranteed. To get started in using the NWS FTPMAIL service, follow these simple directions to obtain the FTPMAIL "help" file (11 KBytes), or see <http://tgftp.nws.noaa.gov/fax/ftpmail.txt>.

Send an e-mail to: [NWS.FTPMail.OPS@noaa.gov](mailto:NWS.FTPMail.OPS@noaa.gov)

Subject line: Put anything you like

Body: help

An FAQ webpage describing several public and commercial FTP-to-EMAIL and WWW-to-EMAIL servers may be found at: [www.fags.org/fags/internet-services/access-via-email/](http://www.fags.org/fags/internet-services/access-via-email/)

A webpage describing several different e-mail "robots" similar in concept to FTPMAIL, including some with advanced features such as allowing retrieval of NWS marine GRIB files, simple webpages, and allowing products to be retrieved on a scheduled, recurring basis may be found at:

<http://tgftp.nws.noaa.gov/fax/robots.txt>

## Internet Broadcasts

Marine weather data may also be obtained via the Internet using EMWIN

<http://www.nws.noaa.gov/om/marine/emwin.htm> or WxWire

(<http://www.nws.noaa.gov/om/marine/wxwire.htm>)

## Watches, Warnings and Advisories Using RSS and CAP XML Based Formats

The National Weather Service provides access to *watches, warnings and advisories for land areas*

<http://www.weather.gov/alerts/>, and for *hurricane watches and warnings*

<http://www.nhc.noaa.gov/aboutrss.shtml>, via RSS <http://www.weather.gov/alerts/#rss> and

CAP/XML <http://www.weather.gov/alerts/#cap> to aid the automated dissemination of this information.

Planning is in progress to extend this to marine warnings.

## Change Notices

For details on changes to NWS products, visit the *Office of Climate, Water, and Weather Services*

*Service Change Notifications* <http://www.nws.noaa.gov/om/notif.htm>, the *Requirements and*

*Change Management Status* page <http://www.nws.noaa.gov/om/cm/status.html>, and *NWS*

*Telecommunication Operations Center (TOC) Data Management Change Notices*

<http://www.nws.noaa.gov/datamgmt/notices.shtml> webpages. See

<http://www.nws.noaa.gov/om/marine/recent.htm> for a summary of recent changes of most interest to mariners and coastal residents.

## Directories of NWS Marine Forecasts

For Website developers or other "power" users, many NWS marine text forecast products are available at the following URL's, indexed by WMO header or zone.

<http://tgftp.nws.noaa.gov/data/forecasts/marine/>  
<ftp://tgftp.nws.noaa.gov/data/forecasts/marine/>  
<http://tgftp.nws.noaa.gov/data/raw/>  
<ftp://tgftp.nws.noaa.gov/data/raw/>  
<http://www.ndbc.noaa.gov/data/Forecasts/>  
<http://tgftp.nws.noaa.gov/data/>  
[http://forecast.weather.gov/product\\_types.php](http://forecast.weather.gov/product_types.php)  
<http://www.weather.gov/view/validProds.php>

Many National Weather Service Weather Charts may be found in the following directories, indexed by WMO ID or other identifier.

<http://tgftp.nws.noaa.gov/fax/>  
<ftp://tgftp.nws.noaa.gov/fax/>

# APPENDIX B

## FTPMAIL INSTRUCTIONS

National Weather Service marine text forecasts, radiofax charts and buoy observations are available via e-mail. Further, FTPMAIL may be used to acquire any file on the tgftp.nws.noaa.gov FTP server. The FTPMAIL server is intended to allow Internet access for mariners and other users who do not have direct access to the World Wide Web but who are equipped with an e-mail system. Turnaround is generally in under one hour, however, performance may vary widely and receipt cannot be guaranteed.

This PDF file contains links to http pages and FTPMAIL commands. The links may not be compatible with all PDF readers and e-mail systems. The Internet is not part of the National Weather Service's operational data stream and should never be relied upon as a means to obtain the latest forecast and warning data. Become familiar with and use other means such as NOAA Weather Radio to obtain the latest forecasts and warnings. Please read our ***disclaimer*** <http://www.nws.noaa.gov/disclaimer.php>.

FTPMAIL help file

\*\*\*\*\*

\*  
\*

WARNING

\* This is a United States Government Computer. Use of  
\* this computer for purposes for which authorization  
\* has not been extended is a violation of federal law.  
\*

\* (Reference Public Law 99-474)

\* For technical assistance with FTPMAIL contact:

\*

\* marine.weather@noaa.gov 301-427-9390

\*

\*\*\*\*\*

\*\*\*\* IMPORTANT NOTICES \*\*\*\* Read these notes carefully \*\*\*\*

Effective September 07, 2016, the address of the FTPMAIL service changed from NWS.FTPMail.OPS@noaa.gov to NWS.FTPMail.OPS@noaa.gov.

If you restrict incoming e-mail as a means of preventing spam, you must configure your e-mail system to allow mail from NWS.FTPMail.OPS@noaa.gov

CAUTION - READ THIS HELP FILE CAREFULLY - 99% OF ERRORS USING FTPMAIL ARE SIMPLE TYPO'S, INCORRECT CAPITALIZATION, FAILURE TO SEND IN PLAIN TEXT FORMAT, LEADING OR TRAILING SPACES, OR FAILURE TO SET UP ANY SPAM FILTERS PROPERLY. FOLLOW THE EXAMPLES CLOSELY!

FTPMAIL e-mail requests must be sent in ASCII/Plain Text only.  
HTML formatting will likely result in no response from the FTPMAIL server.

This "help" file contains a detailed description of the FTPMAIL system and available products. To obtain another copy of the FTPMAIL "help" file:

-In plain text format-

Send an e-mail to: NWS.FTPMail.OPS@noaa.gov  
Subject Line: Put anything you like  
Body: help

These instructions are subject to revision....download frequently.

tgftp.nws.noaa.gov is the only valid FTP site for this service.

This National Weather Service (NWS) FTPMAIL server is intended to allow Internet access for users who do not have direct access to the World Wide Web but who are equipped with an e-mail system. The service is free and no signup is required. Using FTPMAIL, users can request files from NWS and have them automatically e-mailed back to them. Turnaround is generally in under one hour, however, performance may vary widely and receipt cannot be guaranteed.

NOTICE - Check time and date of forecasts. Downloaded data may not represent the latest forecast. The Internet is not part of the National Weather Service's operational data stream and should never be relied upon as a means to obtain the latest forecast and warning data. Become familiar with and use other means such as NOAA Weather Radio to obtain the latest forecasts and warnings. Please read our disclaimer at <http://www.nws.noaa.gov/disclaimer.php>

Although these instructions are tailored for marine users to gain access to graphic(radiofax) and text products via e-mail, all publicly available data on the [tgftp.nws.noaa.gov](http://tgftp.nws.noaa.gov) Internet FTP server is accessible using the FTPMAIL service.

To use FTPMAIL, the user sends a small script file via e-mail to NWS requesting the desired file(s). A list of available product directories, retrievable via FTPMAIL is shown below.

Users should be familiar with sending and receiving messages and attachments with their particular e-mail system. Attachments are received in UUencoded form. The majority of modern e-mail systems handle the conversion automatically, other users will need to run the UUdecode program for their particular system. If your e-mail system does not UUENCODE automatically, you will get back a bunch of gibberish starting with something like "begin 600 PWAE98.TIF" See your system administrator if you have any questions on this topic. UUdecode freeware and shareware may also be found on the Web, but the easier solution is to try a different e-mail system if that option is open to you. The UUencoding process can add 0 to >100% overhead depending on your system and the type of file.

Files which are greater than approximately 400KB in length may be sent as multiple e-mails which must then be appended to another and UUdecoded. This can be avoided using the "size" command following the "open" statement, e.g. "size 1000000". The maximum allowable is 2MB.

Files sizes for NWS radiofax graphic files average 35KB but can be much greater especially some satellite images which can approach 1MB. Use the "dir" command to ascertain the size of files of interest as a precaution. Users should be aware of the costs for operating their particular e-mail system before attempting to use FTPMAIL, especially when using satellite communication systems. For marine users, using FTPMAIL via INMARSAT-C for obtaining current NWS radiofax graphic files is cost prohibitive. Using the FTPMAIL compression feature of FTPMAIL is not recommended as these files are already in a compressed T4(G4) format enveloped in TIFF for viewing. You will need a graphics program capable of displaying files in this format in order to view them. Suggestions for TIFF viewers may be found in file <http://weather.noaa.gov/fax/rfaxtif.txt>

NEW! Radiofax .TIF files now also available as (larger) .gif files

The following examples demonstrate the use of FTPMAIL. Indexes of currently available marine products, the list FTPMAIL commands, and suggestions for TIFF viewers may be obtained following these instructions.

To use FTPMAIL:

-In plain text format-

- o Send an e-mail via the Internet to: NWS.FTPMail.OPS@noaa.gov
- o Put anything you like on the subject line
- o Enter a command script in the body of the message

NOTE: Correct capitalization for commands, directory and file names is critical

Example scripts are:

help

Connect to default\_site (tgftp.nws.noaa.gov) and send back this help file to e-mail address of requestor

open  
cd fax  
get PWAE98.TIF  
quit

Connect to default\_site (tgftp.nws.noaa.gov) and send back the chart file PWAE98.TIF to e-mail address of requestor

open  
cd data  
cd forecasts  
cd marine  
cd coastal  
cd an  
get anz231.txt  
quit

Connect to default\_site (tgftp.nws.noaa.gov) and send back coastal marine zone forecast ANZ231 to e-mail address of requestor

open  
cd data  
cd forecasts  
cd zone  
cd md  
get mdz009.txt  
quit

Connect to default\_site (tgftp.nws.noaa.gov) and send back public land zone forecast MDZ009 to e-mail address of requestor.  
(Contact your local forecast office to identify the public forecast zone number for your county, known as the UGC code)  
Zones lists by State may also be found at <http://alerts.weather.gov/>

```
reply-to captain.kidd@noaa.gov
open
dir
quit
```

Connect to default\_site (tgftp.nws.noaa.gov) and send back the contents of the top level directory to captain.kidd@noaa.gov

```
open
cd fax
get ftpcmd.txt      (List of FTPMAIL commands)
get rfaxtif.txt     (TIFF suggestions)
get rfaxatl.txt     (Atlantic radiofax file directory)
get rfaxpac.txt     (Pacific radiofax file directory)
get rfaxmex.txt     (Gulf of Mexico and Trop Atl radiofax file dir)
get rfaxak.txt      (Alaska radiofax and ice file directory)
get rfaxhi.txt      (Hawaii radiofax file directory)
get otherfax.txt    (Foreign charts file directory)
get marine1.txt     (Highseas,Offshore,Open Lakes,NAVTEX text file dir)
get marine2.txt     (Hurricane text file directory)
get marine3.txt     (Coastal forecasts text file directory)
get marine4.txt     (Offshore forecasts by zone directory)
get marine5.txt     (Atlantic coastal forecasts by zone directory)
get marine6.txt     (Pacific coastal forecasts by zone directory)
get marine7.txt     (Gulf of Mexico coastal forecasts by zone dir)
get marine8.txt     (Great Lakes coastal forecasts by zone directory)
get marine9.txt     (Alaska coastal forecasts by zone directory)
get marine10.txt    (Hawaii&Trust coastal forecasts by zone directory)
get uk.txt          (UK marine forecasts from Bracknell directory)
get canada.txt      (Canadian marine text forecast directory)
get tsunami.txt     (Tsunami products directory)
get buoydata.txt    (Buoy and C-MAN station observations directory)
get robots.txt      (Marine forecasts and info via e-mail systems)
quit
```

Connect to default\_site (tgftp.nws.noaa.gov) and send back the requested files to e-mail address of requestor.

Many, but not all National Weather Service forecast products may be obtained using FTPMAIL if the WMO/AWIPS Header is known as follows.

Example:

To obtain the Atlantic high seas Forecast, WMO header FZNT01 KWBC, AWIPS header HSFAT1

```
Send an e-mail to:  NWS.FTPMail.OPS@noaa.gov
Subject Line:       Put anything you like
Body:               open
                   cd data
                   cd raw
                   cd fz
                   get fznt01.kWbc.hsf.atl.txt
                   quit
```

\*\*\*\*\*SPECIAL NOTES\*\*\*\*\*

CAUTION - READ THIS HELP FILE CAREFULLY - 99% OF ERRORS USING FTPMAIL ARE SIMPLE TYPO'S, INCORRECT CAPITALIZATION, FAILURE TO SEND IN PLAIN TEXT FORMAT, LEADING OR TRAILING SPACES, OR FAILURE TO SET UP ANY SPAM FILTERS PROPERLY. FOLLOW THE EXAMPLES CLOSELY!

FTPMAIL e-mail requests must be sent in ASCII/Plain Text only. HTML formatting will likely result in no response from the FTPMAIL server.

Make certain you have not enabled any auto-reply function in your email system.

If you see the following response and believe your script to be correct, the most likely problem is that you are sending your e-mail in HTML format rather than the required plain text format.

<FTP EMAIL> response  
ftpmail has failed to queue your request with an error of:  
Must have an 'open [site [user [pass]]]'

tgftp.nws.noaa.gov is the only valid FTP site for this service.

Problems have been reported by users of Hotmail. (This may now be fixed)

If you restrict incoming e-mail as a means of preventing spam, you must program your e-mail system to allow messages from:  
NWS.FTPMail.OPS@noaa.gov

The majority of error messages have been disabled. You may or may not receive an error message back from FTPMAIL if your script is in error.

FTPMAIL problems are occasionally encountered when embedded control characters are received within the e-mail message received by the FTPMAIL server. These control characters may be introduced by the user's e-mail system and may be unavoidable.

Also be certain that each of your commands does not have any leading and/or trailing space(s) or you may see an error message with a number of statements saying "=20"

Problems may also be encountered in trying to go down several levels of directories simultaneously, e.g. "cd data/forecasts/marine/test". Use a series of commands "cd data", "cd forecasts", "cd marine" instead. In both these instances, the likely error will be "Directory not Found"

If the FTPMAIL server is too busy, you will receive an e-mail with a subject line similar to: "ftpmail job queuing for retry queue/097095.69568" Your request will be resubmitted automatically and your requested file(s) should be received within several hours.

\*\*\*\*\*

An FAQ webpage describing several public and commercial FTP-to-EMAIL

and WWW-to-EMAIL servers may be found at:  
[www.faq.s.org/faq.s/internet-services/access-via-email/](http://www.faq.s.org/faq.s/internet-services/access-via-email/)

<ftp://tgftp.nws.noaa.gov/fax/ftpmail.txt>

\*\*\*FTPMAIL commands for NWS.FTPMail.OPS@noaa.gov FTPMAIL server\*\*\*

\*\*\*\* IMPORTANT NOTICES \*\*\*\*

Effective September 07, 2016, the address of the FTPMAIL service changed from NWS.FTPMail.OPS@noaa.gov to NWS.FTPMail.OPS@noaa.gov. If you restrict incoming e-mail as a means of preventing spam, you must configure your e-mail system to allow mail from NWS.FTPMail.OPS@noaa.gov

Read the help file carefully - 99% of errors using FTPMAIL are simple typo's, incorrect capitalization, failure to send in plain text format, leading or trailing spaces, or failure to set up any spam filters properly.

These instructions are subject to revision....download frequently.

FTP's files and sends them back via electronic mail

NOTE: \*.noaa.gov are the only valid FTP sites for this FTPMAIL server.

NOTE: Capitalization is critical for this server. Commands are un-capitalized, while some directory and file names are CAPITALIZED, while others are un-capitalized.

To use FTPMAIL:

- o Send an E-mail via the Internet to NWS.FTPMail.OPS@noaa.gov
- o Put anything you like on the subject line
- o Enter a command script in the body of the message

Example scripts are:

```
reply-to lmjm@server.big.ac.uk
open
dir
quit
```

Connect to default\_site (tgftp.nws.noaa.gov) and send back the contents of the top level directory to lmjm@server.big.ac.uk

```
open
```

```
cd fax
get PWAG01.TIF
quit
```

Connect to default\_site (tgftp.nws.noaa.gov) and send back the  
chart file PWAG01.TIF to e-mail address of requestor

>>Valid commands to the ftpmail gateway are:

reply-to email-address      Who to send the response to. This is optional  
and defaults to the users email address

>>Followed by one of:

help                        Just send back help

delete jobid                Delete the given job  
                            (jobid is received from server)

open [site [user [pass]]]  
                            Site to ftp to. Default is:  
  
                            default\_site anonymous reply-to-address.

>>If there was an open then it can be followed by up to 100 of the  
>>following commands

cd pathname                Change directory.  
cd ..                      Move up 1 directory.  
cd /                        Move to the root directory.

ls [pathname]              Short listing of pathname.  
                            Default pathname is current directory.

dir [pathname]             Long listing of pathname.  
                            Default pathname is current directory.

get pathname                Get a file and email it back.

compress                    Compress files/dir-listings before emailing back

gzip                        Gzip files/dir-listings before emailing back

uuencode                    These are mutually exclusive options for  
btoa                        converting a binary file before emailing.  
                            (Default is uuencode.)

force uuencode              Force all files or directory listings to  
force btoa                  be encoded before sending back.  
                            There is no default.

mime                        Send the message as a Mime Version 1.0 message.  
                            Text will be sent as text/plain charset=US-ASCII  
                            Non-text as application/octet-stream.  
                            If the file is splitup then it will be sent  
                            as a message/partial.

force mime	As mime but force text files to be sent as application/octet-stream
no [compress gzip uuencode btoa mime]	Turn the option off.
size num[K M]	Set the max size a file can be before it is split up and emailed back in parts to the given number of Kilo or Mega bytes. This is limited to 275KB. Default is 275KB.
mode binary	Change the mode selected for the get
mode ascii	command. Defaults to binary.
quit	End of input - ignore any following lines.

NATIONAL WEATHER SERVICE RADIOFAX PRODUCTS  
for the Western Atlantic Ocean

\*\*\*\* IMPORTANT NOTICES \*\*\*\*

Effective September 07, 2016, the address of the FTPMAIL service changed from ftpmail@ftpmail.nws.noaa.gov to NWS.FTPMail.OPS@noaa.gov. If you restrict incoming e-mail as a means of preventing spam, you must configure your e-mail system to allow mail from NWS.FTPMail.OPS@noaa.gov

Read the help file carefully - 99% of errors using FTPMAIL are simple typo's, incorrect capitalization, failure to send in plain text format, leading or trailing spaces, or failure to set up any spam filters properly.

The "help" file contains a more detailed description of the FTPMAIL system and available products. To obtain a copy of the FTPMAIL "help" file.

-In plain text format-

Send an e-mail to: NWS.FTPMail.OPS@noaa.gov  
Subject Line: Put anything you like  
Body: help

These instructions are subject to revision....download frequently.

\*\*\*\*\*

U.S. Coast Guard Communications Station NMF - Boston, Massachusetts

Assigned frequencies 4235.0, 6340.5, 9110, 12750 kHz

Select a carrier frequency 1.9 kHz below those listed when using a single sideband radio in the USB mode to receive these broadcasts.

The latest version of marine weather charts for broadcast by the U.S. Coast Guard are available from the National Weather Service Telecommunication Gateway on this server. The listed charts are in the G4(T4) format and enveloped in TIFF for viewing. Satellite images are in JPEG format. These charts may be found in directory: ftp://tgftp.nws.noaa.gov/fax or http://tgftp.nws.noaa.gov/fax

For information of how these files and other text and graphic marine forecasts may be downloaded via e-mail (FTPMAIL) see:  
http://tgftp.nws.noaa.gov/fax/ftpmail.txt

.TIF files now also available as .gif files

This file is intended to assist mariners using the FTPMAIL system which is used to obtain National Weather Service products via e-mail. The following is an example in the use of the FTPMAIL system. NOTE CAPITALIZATION!

Example using FTPMAIL:

-In plain text format-

Send an e-mail to: NWS.FTPMail.OPS@noaa.gov  
Subject line: Put anything you like  
Body: open  
cd fax  
get PPAE10.TIF  
get PWAE98.gif  
quit

These files may be found in directories:

ftp://tgftp.nws.noaa.gov/fax or

<http://tgftp.nws.noaa.gov/fax>

NATIONAL WEATHER SERVICE RADIOFAX PRODUCTS  
for the North and Tropical East Pacific

\*\*\*\* IMPORTANT NOTICES \*\*\*\*

Effective September 07, 2016, the address of the FTPMAIL service changed from NWS.FTPMail.OPS@noaa.gov to NWS.FTPMail.OPS@noaa.gov.

If you restrict incoming e-mail as a means of preventing spam, you must configure your e-mail system to allow mail from NWS.FTPMail.OPS@noaa.gov

Read the help file carefully - 99% of errors using FTPMAIL are simple typo's, incorrect capitalization, failure to send in plain text format, leading or trailing spaces, or failure to set up any spam filters properly.

The "help" file contains a more detailed description of the FTPMAIL system and available products. To obtain a copy of the FTPMAIL "help" file.

-In plain text format-

Send an e-mail to: NWS.FTPMail.OPS@noaa.gov  
Subject Line: Put anything you like  
Body: help

These instructions are subject to revision....download frequently.

\*\*\*\*\*

U.S. Coast Guard Communications Station NMC - Point Reyes, CA

Assigned frequencies 4346, 8682, 12786, 17151.2, 22527 kHz

Select a carrier frequency 1.9 kHz below those listed when using a single sideband radio in the USB mode to receive these broadcasts.

The latest version of marine weather charts for broadcast by the U.S. Coast Guard are available from the National Weather Service Telecommunication Gateway on this server. The listed charts are in the G4(T4) format and enveloped in TIFF for viewing. Satellite images are in JPEG format. These charts may be found in directory: <ftp://tgftp.nws.noaa.gov/fax> or <http://tgftp.nws.noaa.gov/fax>

For information of how these files and other text and graphic marine forecasts may be downloaded via e-mail (FTPMAIL) see:  
<http://tgftp.nws.noaa.gov/fax/ftpmail.txt>

.TIF files now also available as .gif files

This file is intended to assist mariners using the FTPMAIL system which is used to obtain National Weather Service products via e-mail. The following is an example in the use of the FTPMAIL system. NOTE CAPITALIZATION!

Example using FTPMAIL:

-In plain text format-

Send an e-mail to: NWS.FTPMail.OPS@noaa.gov  
Subject line: Put anything you like  
Body: open  
cd fax  
get PWBE10.TIF  
get PWBM99.gif  
quit

These files may be found in directories:  
ftp://tgftp.nws.noaa.gov/fax or  
<http://tgftp.nws.noaa.gov/fax>

NATIONAL WEATHER SERVICE RADIOFAX PRODUCTS  
for the Gulf of Mexico, Caribbean, Tropical Atlantic and Tropical E Pacific

\*\*\*\* IMPORTANT NOTICES \*\*\*\*

Effective September 07,2016, the address of the FTPMAIL service changed from NWS.FTPMail.OPS@noaa.gov to NWS.FTPMail.OPS@noaa.gov.  
If you restrict incoming e-mail as a means of preventing spam, you must configure your e-mail system to allow mail from NWS.FTPMail.OPS@noaa.gov

Read the help file carefully - 99% of errors using FTPMAIL are simple typo's, incorrect capitalization, failure to send in plain text format, leading or trailing spaces, or failure to set up any spam filters properly.

The "help" file contains a more detailed description of the FTPMAIL system and available products. To obtain a copy of the FTPMAIL "help" file.

-In plain text format-

Send an e-mail to: NWS.FTPMail.OPS@noaa.gov  
Subject Line: Put anything you like  
Body: help

These instructions are subject to revision....download frequently.

\*\*\*\*\*

U.S. Coast Guard Communications Station NMG - New Orleans, Louisiana

Assigned frequencies 4317.9, 8503.9 12789.9, 17146.4 kHz

Select a carrier frequency 1.9 kHz below those listed when using a single sideband radio in the USB mode to receive these broadcasts.

The latest version of marine weather charts for broadcast by the U.S. Coast Guard are available from the National Weather Service Telecommunication Gateway on this server. The listed charts are in the G4(T4) format and enveloped in TIFF for viewing. These charts may be found in directory: <ftp://tgftp.nws.noaa.gov/fax> or <http://tgftp.nws.noaa.gov/fax>

For information of how these files and other text and graphic marine forecasts may be downloaded via e-mail (FTPMAIL) see: <http://tgftp.nws.noaa.gov/fax/ftpmail.txt>

.TIF files now also available as .gif files

This file is intended to assist mariners using the FTPMAIL system which is used to obtain National Weather Service products via e-mail. The following is an example in the use of the FTPMAIL system. NOTE CAPITALIZATION!

Example using FTPMAIL:

-In plain text format-

Send an e-mail to: NWS.FTPMail.OPS@noaa.gov  
Subject line: Put anything you like  
Body: open  
cd fax  
get PWEE11.TIF  
get PYEA11.gif  
quit

These files may be found in directories:

ftp://tgftp.nws.noaa.gov/fax or

<http://tgftp.nws.noaa.gov/fax>

NATIONAL WEATHER SERVICE RADIOFAX PRODUCTS  
for the Northeast and Eastern Pacific

\*\*\*\* IMPORTANT NOTICES \*\*\*\*

Effective September 07, 2016, the address of the FTPMAIL service changed from NWS.FTPMail.OPS@noaa.gov to NWS.FTPMail.OPS@noaa.gov.

If you restrict incoming e-mail as a means of preventing spam, you must configure your e-mail system to allow mail from NWS.FTPMail.OPS@noaa.gov

Read the help file carefully - 99% of errors using FTPMAIL are simple typo's, incorrect capitalization, failure to send in plain text format, leading or trailing spaces, or failure to set up any spam filters properly.

The "help" file contains a more detailed description of the FTPMAIL system and available products. To obtain a copy of the FTPMAIL "help" file.

-In plain text format-

Send an e-mail to: NWS.FTPMail.OPS@noaa.gov  
Subject Line: Put anything you like  
Body: help

These instructions are subject to revision....download frequently.

\*\*\*\*\*

U.S. Coast Guard Communications Station NOJ - Kodiak, Alaska

Assigned frequencies 2054, 4298, 8459, 12410.6 kHz

Select a carrier frequency 1.9 kHz below those listed when using a single sideband radio in the USB mode to receive these broadcasts.

The latest version of marine weather charts for broadcast by the U.S. Coast Guard are available from the National Weather Service Telecommunication Gateway on this server. The listed charts are in the G4(T4) format and enveloped in TIFF for viewing. Satellite images are in JPEG format. These charts may be found in directory: <ftp://tgftp.nws.noaa.gov/fax> or <http://tgftp.nws.noaa.gov/fax>

For information of how these files and other text and graphic marine forecasts may be downloaded via e-mail (FTPMAIL) see:  
<http://tgftp.nws.noaa.gov/fax/ftpmail.txt>

.TIF files now also available as .gif files

This file is intended to assist mariners using the FTPMAIL system which is used to obtain National Weather Service products via e-mail. The following is an example in the use of the FTPMAIL system. NOTE CAPITALIZATION!

Example using FTPMAIL:

-In plain text format-

Send an e-mail to: NWS.FTPMail.OPS@noaa.gov  
Subject line: Put anything you like  
Body: open  
cd fax  
get PJBI99.TIF  
get PYBE10.gif  
quit

These files may be found in directories:  
ftp://tgftp.nws.noaa.gov/fax or  
http://tgftp.nws.noaa.gov/fax

NATIONAL WEATHER SERVICE MARINE TEXT PRODUCTS  
HIGHSEAS, FORECAST DISCUSSION, OFFSHORE, NAVTEX, and OPEN LAKE PRODUCTS

\*\*\*\* IMPORTANT NOTICES \*\*\*\*

Effective September 07, 2016, the address of the FTPMAIL service changed from ftpmail@ftpmail,nws.noaa.gov to NWS.FTPMail.OPS@noaa.gov. If you restrict incoming e-mail as a means of preventing spam, you must configure your e-mail system to allow mail from NWS.FTPMail.OPS@noaa.gov

Read the help file carefully - 99% of errors using FTPMAIL are simple typo's, incorrect capitalization, failure to send in plain text format, leading or trailing spaces, or failure to set up any spam filters properly.

The "help" file contains a more detailed description of the FTPMAIL system and available products. To obtain a copy of the FTPMAIL "help" file.

-In plain text format-

Send an e-mail to: NWS.FTPMail.OPS@noaa.gov  
Subject Line: Put anything you like  
Body: help

These instructions are subject to revision....download frequently.

\*\*\*\*\*

This file is intended to assist mariners using the FTPMAIL system which is used to obtain National Weather Service products via e-mail. The following is an example in the use of the FTPMAIL system. NOTE CAPITALIZATION!

-In plain text format-

Send an e-mail to: NWS.FTPMail.OPS@noaa.gov  
Subject Line: Put anything you like  
Body: open  
cd data  
cd forecasts  
cd marine  
cd high\_seas  
get north\_pacific.txt  
get north\_atlantic.txt  
quit

HIGH SEAS FORECASTS

These files may be found in directories:

ftp://tgftp.nws.noaa.gov/data/forecasts/marine/high\_seas/  
http://tgftp.nws.noaa.gov/data/forecasts/marine/high\_seas/

PRODUCT DESCRIPTION

FILE NAME

Northwest Atlantic Highseas (GMDSS Area IV)	<a href="#">north_atlantic.txt</a>
Northeast Pacific Highseas (GMDSS Area XII)	<a href="#">north_pacific.txt</a>
Peru Highseas (GMDSS Area XVI)	<a href="#">east_pacific 3.txt</a>

25S-0N, 160E-120W South Central Pacific	<a href="#">south hawaii.txt</a>
30-60N, east of 160 E (p/o NE Pacific)	<a href="#">east pacific 1.txt</a>
0-30N, E of 140W (p/o NE Pacific)	<a href="#">east pacific 2.txt</a>
0-30N, 160E-140W (p/o NE Pacific)	<a href="#">north hawaii.txt</a>

#### FORECAST DISCUSSION

These files may be found in directories:

<ftp://tgftp.nws.noaa.gov/data/raw/ag/>

<http://tgftp.nws.noaa.gov/data/raw/ag/>

Example:

-In plain text format-

Send an e-mail to: NWS.FTPMail.OPS@noaa.gov

Subject Line: Put anything you like

Body: open  
cd data  
cd raw  
cd ag  
get agnt40.kWnm.mim.atn.txt  
quit

#### PRODUCT DESCRIPTION

#### FILE NAME

Northwest Atlantic	<a href="#">agnt40.kWnm.mim.atn.txt</a>
Northeast Pacific	<a href="#">agpn40.kWnm.mim.pac.txt</a>
Gulf, Caribbean Sea & SW N. Atlantic	<a href="#">agxx40.knhc.mim.ats.txt</a>

Note...these Forecast Discussions are primarily intended for use by forecasters and make heavy use of abbreviations. A glossary is not available.

#### OFFSHORE FORECASTS

These files may be found in directories:

<ftp://tgftp.nws.noaa.gov/data/raw/fz/>

<http://tgftp.nws.noaa.gov/data/raw/fz/>

Example:

-In plain text format-

Send an e-mail to: NWS.FTPMail.OPS@noaa.gov

Subject Line: Put anything you like

Body: open  
cd data  
cd raw  
cd fz  
get fznt21.kWbc.off.nt1.txt  
quit

#### PRODUCT DESCRIPTION

#### FILE NAME

New England	<a href="#">fznt21.kWbc.off.nt1.txt</a>
Short version for radio broadcast	<a href="#">fznt33.kWbc.off.n31.txt</a>
Mid-Atlantic	<a href="#">fznt22.kWbc.off.nt2.txt</a>
Short version for radio broadcast	<a href="#">fznt34.kWbc.off.n32.txt</a>
SW North Atlantic, Caribbean	<a href="#">fznt23.knhc.off.nt3.txt</a>

Short version for radio broadcast	<a href="#">fznt31.knhc.off.n20.txt</a>
Gulf of Mexico	<a href="#">fznt24.knhc.off.nt4.txt</a>

Hawaii	<a href="#">fzhw60.phfo.off.hfo.txt</a>

#### NAVTEX FORECASTS

For offshore areas, NAVTEX forecasts can also be utilized which are similar to offshore forecasts and may contain supplementary information at times for coastal areas.

These files may be found in directories:

<ftp://tgftp.nws.noaa.gov/data/raw/fz/>

<http://tgftp.nws.noaa.gov/data/raw/fz/>

Example:

-In plain text format-

Send an e-mail to: NWS.FTPMail.OPS@noaa.gov

Subject Line: Put anything you like

Body:

```

open
cd data
cd raw
cd fz
get fznt23.kWnm.off.n01.txt
quit
```

#### NAVTEX FORECASTS

These files may be found in directory:

<ftp://tgftp.nws.noaa.gov/data/raw/fz/>

Example:

Send an e-mail to: NWS.FTPMail.OPS@noaa.gov

Subject Line: Put anything you like

Body:

```

open
cd data
cd raw
cd fz
get fznt23.kWnm.off.n01.txt
quit
```

#### PRODUCT DESCRIPTION

#### FILE NAME

NATIONAL WEATHER SERVICE MARINE TEXT PRODUCTS  
COASTAL and NEARSHORE MARINE FORECASTS

\*\*\*\* IMPORTANT NOTICES \*\*\*\*

Effective September 07, 2016, the address of the FTPMAIL service changed from NWS.FTPMail.OPS@noaa.gov to NWS.FTPMail.OPS@noaa.gov. If you restrict incoming e-mail as a means of preventing spam, you must configure your e-mail system to allow mail from NWS.FTPMail.OPS@noaa.gov

Read the help file carefully - 99% of errors using FTPMAIL are simple typo's, incorrect capitalization, failure to send in plain text format, leading or trailing spaces, or failure to set up any spam filters properly.

The "help" file contains a more detailed description of the FTPMAIL system and available products. To obtain a copy of the FTPMAIL "help" file.

-In plain text format-

Send an e-mail to: NWS.FTPMail.OPS@noaa.gov  
Subject Line: Put anything you like  
Body: help

These instructions are subject to revision....download frequently.

\*\*\*\*\*

This file is intended to assist mariners using the FTPMAIL system which is used to obtain National Weather Service products via e-mail. The following is an example in the use of the FTPMAIL system. NOTE CAPITALIZATION!

-In plain text format-

Send an e-mail to: NWS.FTPMail.OPS@noaa.gov  
Subject Line: Put anything you like  
Body: open  
cd data  
cd raw  
cd fz  
get fzus56.kmtr.cwf.mtr.txt  
quit

Document URL: <http://tgftp.nws.noaa.gov/fax/marine3.txt>

<ftp://tgftp.nws.noaa.gov/fax/marine3.txt>

## Marine Forecasts and Related Information Available via E-mail

National Weather Service (and other) marine forecasts are available via a variety of Government, University, Commercial and Public/Freeware systems intended to make information accessible to users such as mariners who may have an e-mail capability but do not have direct Internet access. The following is a listing of several known automated systems.

Note: Any reference to any product or service does not imply any endorsement by the National Weather Service as to function or suitability for your purpose or environment.

This document (<http://tgftp.nws.noaa.gov/fax/robots.txt>) may be retrieved via e-mail as follows:

-In plain text format-

Send an e-mail to: NWS.FTPMail.OPS@noaa.gov  
Subject line: Put anything you like  
Body: open  
cd fax  
get robots.txt  
quit

>>>>FTPMAIL<<<<

\*\*\*\* IMPORTANT NOTICES \*\*\*\*

Effective September 07, 2016, the address of the FTPMAIL service changed from NWS.FTPMail.OPS@noaa.gov to NWS.FTPMail.OPS@noaa.gov.

If you restrict incoming e-mail as a means of preventing spam, you must configure your e-mail system to allow mail from NWS.FTPMail.OPS@noaa.gov

Read the help file carefully - 99% of errors using FTPMAIL are simple typo's, incorrect capitalization, failure to send in plain text format, leading or trailing spaces, or failure to set up any spam filters properly.

These instructions are subject to revision....download frequently.

National Weather Service marine text forecasts and radiofax charts are available via e-mail via an FTPMAIL server. Further, FTPMAIL may be used to acquire any file on the [tgftp.nws.noaa.gov](http://tgftp.nws.noaa.gov) FTP server. The FTPMAIL server is intended to allow Internet access for mariners and other users who do not have direct access to the World Wide Web but who are equipped with an e-mail system. Turnaround is generally less than one hour, however, performance may vary widely and receipt cannot be guaranteed. To get started in using the NWS FTPMAIL service, follow these simple directions to obtain the FTPMAIL "help" file (11 KBytes), or see <http://tgftp.nws.noaa.gov/fax/ftpmail.txt>

-In plain text format-

Send an e-mail to: NWS.FTPMail.OPS@noaa.gov  
Subject line: Put anything you like

Body: help

>>>>NOAA/NWS Products Not Available via FTPMAIL<<<<

Not all NWS forecast products are available via FTP and therefore accessible via FTPMAIL such as worldwide computer generated model forecasts which include areas beyond the area of U.S. forecasting responsibility such as the Indian Ocean and South Atlantic.

(1)To retrieve Wave Watch III

([http://polar.ncep.noaa.gov/waves/product\\_table.shtml?-multi\\_1-](http://polar.ncep.noaa.gov/waves/product_table.shtml?-multi_1-))

and other forecasts via e-mail, use one of the www-to-email systems such as SAILDOCS or OTHERS described below. Be aware computer generated products from forecast models are not reviewed by forecasters and are therefore subject to error. E.G. per the Wave Watch III webpage:

URLs =

[http://polar.ncep.noaa.gov/waves/WEB\\_P/www.latest\\_run/plots/xxxx.yyyy.zzzz.png](http://polar.ncep.noaa.gov/waves/WEB_P/www.latest_run/plots/xxxx.yyyy.zzzz.png)

e.g. 24hr Wind Speed and Direction Forecast for NE Atlantic =

[http://polar.ncep.noaa.gov/waves/WEB\\_P/multi\\_1.latest\\_run/plots/NE\\_atlantic.u10.f024h.png](http://polar.ncep.noaa.gov/waves/WEB_P/multi_1.latest_run/plots/NE_atlantic.u10.f024h.png)

where www =

>>>>SAILDOCS<<<<

SAILDOCS is an email-based document-retrieval system which currently offers two services: a document retrieval service which will return documents from the Internet or SAILDOCS own files, and a subscription service which will send Internet documents (for example weather reports) at scheduled intervals. SAILDOCS files include National Weather Service text forecasts and gridded binary (GRIB files) for wind, pressure, 500mb, and sea surface temperature. SAILDOCS is supported in part by Sailmail ([www.sailmail.com](http://www.sailmail.com)) but is an independent service that can be used by anyone who agrees to the terms and conditions. To get started in using SAILDOCS, follow these simple directions to obtain further information, or see: <http://www.saildocs.com/>

Send an e-mail to: [info@saildocs.com](mailto:info@saildocs.com)  
Subject line: Put anything you like  
Body: Put anything you like

>>>>>Global Marine Networks (GMN)<<<<<

Global Marine Networks (GMN) offers 7 day wind forecasts of the world as a free public service via its GRIB Mail Robot. See:  
[http://www.globalmarinenet.com/grib\\_downloads.php](http://www.globalmarinenet.com/grib_downloads.php)

>>>>ExpressWeather - MailASail's Free Weather Service<<<<

ExpressWeather is a free, simple system to offer popular weather forecasts and charts by email. It aims to provide a deliberately limited subset of all the weather available, and only to provide the most useful forecasts

in an easy to access format. For details send a blank email with a BLANK subject line to [weather@mailasail.com](mailto:weather@mailasail.com)  
(Remember that some email programs insert "No subject". This has to be deleted)  
or see  
<http://weather.mailasail.com/Franks-Weather/Text-Chart-Grib-Forecasts-From-Mailasail>

Send an e-mail to: [weather@mailasail.com](mailto:weather@mailasail.com)  
Subject line: Leave blank  
Body: Leave blank

>>>>NAVIMAIL<<<<

Météo-France's NAVIMAIL system enables you to receive gridded binary (GRIB files) for wind, pressure, waves, sea surface temperature, as well as text bulletins and satellite images. There is a service charge for GRIB data, however, text bulletins and satellite images are available at no charge. To get started in using NAVIMAIL, follow these simple directions to obtain further information, or see:  
<http://www.meteo.fr/marine/navimail>

-In plain text format-

Send an e-mail to: [NWS.FTPMail.OPS@noaa.gov](mailto:NWS.FTPMail.OPS@noaa.gov)  
Subject line: Put anything you like  
Body: open  
cd fax  
get navimail.txt  
quit

>>>>U.S. NOTICES TO MARINERS BY E-MAIL<<<<

The National Geospatial-Intelligence Agency (NGA) provides a service whereby the U.S Notices to Mariners are e-mailed to the requesting address every weekend, with the following limitations:

- \* The notice transmitted is listed on the Maritime Safety Information (MSI) Website in the "Notice to Mariners" section as "Entire NtM". Graphics provided in this version are inadequate for navigation purposes. Navigation-quality chartlets are available for download on the MSI website as needed.
- \* Many networks and e-mail applications have restrictions on file sizes for e-mail attachments. In order to ensure all notices are received, the limit on file sizes for the receiving account should be changed to 2.5 Mb. Contact your system administrator or help desk for more assistance.
- \* In order to subscribe, the customer must be logged into the e-mail account to which they wish the notice sent. When the hyperlink below is selected, an e-mail window is generated with the "To" and "From" addresses filled out. The "Subject" and "Body" will be blank. Selecting "Send" subscribes the user to the e-mailed Notice to Mariners.
- \* Instructions to unsubscribe from the notice are included in each Notice to Mariners e-mail.

Privacy Act Advisory

Your e-mail address will be used for the purpose of electronically mailing the U.S. Notice to Mariners to you. Upon receipt of your subscription, your identification as the sender will be stripped from your e-mail and only the destination e-mail address you provide will be automatically added to the subscription list. Subscriptions will be processed automatically. If you unsubscribe, your e-mail address will be purged from the file and will not be retained. NGA may collect statistical data about the number of subscribers, number of subscription cancellations, and the number of delivery failures.

To subscribe to U.S. Notices to Mariners by E-mail:  
Send an e-mail to: [join-ntm@goldweb.nga.mil](mailto:join-ntm@goldweb.nga.mil)  
Subject line: Leave blank  
Body: Leave blank

>>>>U.S. COAST GUARD LOCAL NOTICES TO MARINERS (LNM) LISTSERVER<<<<  
LNM's and other maritime related information are available via a one-way listserver at: <http://www.navcen.uscg.gov/?pageName=LNMListRegistration>

>>>>NANUS & GPS STATUS MSGS BY EMAIL<<<<  
Users with an urgent need to be notified of changes to the GPS Constellation may subscribe to the Navigation Center NANU List Server (<http://cgls.uscg.mil/mailman/listinfo/nanu>) and/or the GPS Status Message List Server (<http://cgls.uscg.mil/mailman/listinfo/gps>). These services provide emails containing the NANU and/or GPS Status Messages, generally within 60 minutes of notification by the Air Force of a change to the GPS Constellation. This is a free service. PRIVACY INFORMATION: Disclosure of your email address is voluntary. It is solicited for the sole purpose of delivering the requested information to you and will not be released to any other party.

>>>>U.S. Coast Guard Ice Patrol Chart and Text<<<<  
To receive U.S. Coast Guard Ice Patrol products via email, sign up for Iceberg Chart list server at [https://radioaid.rdc.uscg.gov/mailman/listinfo/iceberg\\_chart](https://radioaid.rdc.uscg.gov/mailman/listinfo/iceberg_chart) and the Iceberg Text Bulletin list server at [https://radioaid.rdc.uscg.gov/mailman/listinfo/iceberg\\_bulletin](https://radioaid.rdc.uscg.gov/mailman/listinfo/iceberg_bulletin). You will be emailed the products daily as soon as they are released. (The iceburg chart is also available via FTPMAIL above)

>>>>OTHERS<<<<

## USEFUL MARINE WEATHER PUBLICATIONS

### *Marine Service Charts (MSC) - Free*

Marine Service Charts (MSC) list frequencies, schedules and locations of stations disseminating NWS products. They also contain additional weather information of interest to the mariner. Charts are also available via the Internet as listed below.

Both sides of the charts are available, both in **JPG** and **PDF** formats. The front side of the charts shows the map and the back side shows the text that accompanies the chart. PDF format is helpful if you need to zoom in on a specific area of the chart.

**Note - As a result of budgetary constraints, these Marine Service Charts are no longer being updated and may contain outdated information. In some cases the amount and/or types of outdated information has resulted in the unfortunate situation that we can no longer justify continuing to make that chart available. Updated information can most often be found on the [Marine Forecasts](#) or [NOAA Weather Radio](#) webpages or from your [Local Weather Forecast Office](#).**

**\* N/A = No longer available**

Location	Number	JPG Format		PDF Format	
Eastport, ME to Montauk Point, NY	MSC-1	N/A	N/A	N/A	N/A
Montauk Point, NY to Manasquan, NJ	MSC-2	N/A	N/A	N/A	N/A

# NOAA WEATHER RADIO NETWORK

- (1) 162.550 MHz
- (2) 162.400 MHz
- (3) 162.475 MHz
- (4) 162.425 MHz
- (5) 162.450 MHz
- (6) 162.500 MHz
- (7) 162.525 MHz

Channel numbers, e.g. (WX1, WX2) etc. have no special significance but are often designated this way in consumer equipment. Other channel numbering schemes are also prevalent.

The NOAA Weather Radio network provides voice broadcasts of local and coastal marine forecasts on a continuous cycle. The forecasts are produced by local National Weather Service Forecast Offices. Coastal stations also broadcast predicted tides and real time observations from buoys and coastal meteorological stations operated by NOAA's National Data Buoy Center. Based on user demand, and where feasible, Offshore and Open Lake forecasts are broadcast as well.

The NOAA Weather Radio network provides near continuous coverage of the coastal U.S, Great Lakes, Hawaii, and populated Alaska coastline. Typical coverage is 25 nautical miles offshore, but may extend much further in certain areas.
